

Terra Nova Laser Space 2

Product Code: NCS8529

RRP Price: £560.00

Our Price: £347.99 (Saving £212.01)

New for 2009, the Laser Space 2 expands on the success of our Laser range of superlite tents and is the first ever lightweight backpacking tent that you can stand up in.

Weighing just over 3kg the amount of space available inside is remarkable, and the 1.76m of headroom makes it possible to change out of wet clothing in the porch whilst keeping the inner tent clean and dry. The porch is 3m² and will accommodate folding chairs and rucksacks with ample space left for cooking or accessing the inner tent. A smaller "back door" makes it possible to exit the tent in the night without crossing your partner, or can be used as a main entrance if the porch is required for storage of large items such as bikes. The use of our superlite fabrics on this model means that the flysheet seams can't be taped, but are instead covered by a pole hood (included). A major benefit of these superlite fabrics (other than the incredible low weight, obviously!) is that this huge 2 person tent has a packed size of a mere 55x20 cms.

Note: Due to the nature of the silicon fabrics used in this tent, the seams are not factory sealed.

Specification

Rated: 3 Season Backpacking/Touring

Sleeps: 2

Pitches flysheet first for speed/simplicity

Packed Weight: 3.33kg
