

Coleman Coastline 3 Plus

Product Code: GPG1783

RRP Price: £99.99

Our Price: £69.99 (Saving £30)

Coleman Coastline 3 Plus - Sturdy, stable and built for easy pitching, this tunnel tent provides excellent space for 3 people with ample living and storage space to cope with all your kit, even on extended stays.

Stay protected from the outdoor elements with the new rising groundsheet that combines the feeling of comfort you get with a sewn-in groundsheet with the excellent ventilation and easy-clean capabilities of a traditional flat groundsheet. Optimum airflow is a key focus on this design with an additional ventilation tile to ensure air circulates throughout the tent.

Features

- Tunnel tent structure offers a good space to weight ratio.
- There is a spacious sleeping area in addition to a large storage area that can accommodate large packs and boots.
- Polyester 185T flysheet
- The Coastline Plus has a PE rising groundsheet which provides weather protection.
- The storage area groundsheet is a thick PE to resist heavy use.
- The bedroom also features strong and resistant PE.
- Breathable polyester and no-see-um mesh inner is lightweight and bug-resistant.
- It features fibreglass poles.
- The pole sections are short enough for them to be packed easily into a rucksack.
- The riser groundsheet allows cool air to enter at the base of the tent and then warm air is pushed out through the ventilation panels.
- Large storage space provides plenty of room for backpacks and equipment and has a good head height.
- Features 2 doors so you do not need to re-pitch if the wind direction changes.
- Optimally place guy-lines along the poles and around the tent ensure stability in high winds. Y-guy-lines provide support but less strain on the tent poles.
- Up in one pitching allows for quick and easy pitching; the inner bedroom is pre-attached and it can be left in when packing the tent away.
- Colour coded poles and pole sleeves and bedroom inner hooks minimise pitching errors.
- Internal pockets.
- PVC windows with covers increase visibility and allow light into the tent but provide privacy when required.
- The power cord vent is a convenient opening so that you can run an electricity cable into the tent.
- Carrybag.
